

Yuxin Li

Tsinghua University | Xinya College | Department of Electronic Engineering

li-yx24@mails.tsinghua.edu.cn | github.com/Cx300-fh

EDUCATION & RESEARCH INTERESTS

Tsinghua University | Undergraduate

Xinya College and Department of Electronic Engineering. GPA: 3.7/4.0.

Interests: Computer vision, world models, harnesses, and embodied intelligence.

SELECTED PREPRINTS

ParallelWorld: Test-Time Scaling for Embodied Reasoning.

Min Chen, Shengjun Zhang, **Yuxin Li**, Zhang Zhang, Xin Fei, Chong Xia, Yueqi Duan.

[arXiv:2608.22971](#), 2026.

MBench: A Comprehensive Benchmark on Memory Capability for Video World Models.

Shengjun Zhang et al., including **Yuxin Li**.

[arXiv:2606.00793](#), 2026.

RESEARCH EXPERIENCE

Video Generation & World Models | Feb 2026 - Present

Prof. Yueqi Duan, Tsinghua University. Research in 3D computer vision, spatial intelligence, and world models; co-author of MBench and ParallelWorld.

Future Prediction with Large Models | Oct 2025 - Present

Prof. Yong Li, Student Research Training, Tsinghua University. Developed time-series input formats and prompts; prepared datasets and evaluation metrics for forecasting with large language models.

Cognition & Olfactory Perception | Mar - Jun 2025

Future Laboratory, Tsinghua University. Designed controlled experiments, collected and cleaned behavioral data, and performed statistical analysis on how self-selected scents affect code compilation performance.

SELECTED PROJECTS & AWARDS

Tencent AI Open Competition, Embodied Intelligence | Jun - Oct 2025

13th nationally in the semifinals; 25th in the finals. Developed quadruped navigation, obstacle avoidance, global path planning, and PPO policies; worked on reward design, simulation training, and deployment on real robots.

THUAI9 Artificial Intelligence Challenge | May 2026

Third prize in both tracks. Independently developed systems for intelligent games and cooperative multi-agent control, including model design, debugging, and iterative improvement.

Electronic Engineering Hardware Design Competition | Jul - Sep 2025

Merit Award, Tsinghua University. Built embedded hardware prototypes and worked on PCB debugging, low-level drivers, and hardware-software integration.

SKILLS & LEADERSHIP

Technical: Python, C++, PyTorch, Git; reinforcement learning (PPO), robot navigation, time-series analysis, data processing, and visualization.

Campus: Deputy Head, Audio & Video Division, Tsinghua Student Press Corps (Jan 2025 - Present). Content production, editorial review, and mentorship; annual outstanding student journalist recognition.
